James,

Manchester Environmental Lab (MEL) will be uploading the data for this project to Ecology's EIM database, so will be available for you to download – will that be sufficient for your needs, or will you be needing any other data deliverables from MEL?

Alan

After this email, let's drop Wally off the copy list or his email will explode. I will keep him informed if an issue rises to management level.

The King County site contact is James Neely (copied here).

Welcome back, James. Please see this email trail regarding data reporting. Also, I'd like to speak with you when you get the chance ((b) (6)).

Regards, Jeff

Thanks Jeff, I think you've answered my questions; the only remaining might be if King County will need deliverables from MEL, or if they will just download our data from EIM. Do you happen to know who the contact at King County is for this project?

Alan

Subject: RE: May Creek Removal Action Status

Following EPA's removal action, Ecology will assume control and all subsequent sampling of the monitoring wells for approximately 2 years (or until they see fit) and then they will abandon the wells. Ecology will not have to report any future analytical results to EPA because we will no longer be involved in any further cleanup action at the site. The purpose of the wells and water sampling is to provide data to Ecology and/or King County so that can assess the groundwater quality and determine whether and what type of additional future cleanup actions may be necessary.

Alan, if I'm misunderstanding your question, please call my cell: (b) (6) .

Thanks.

Hi Alan,

Unfortunately, I can't answer your question. Jeff Fowlow is the project manager and I'm sure he can. Thanks for your contribution to the project.

Wally

Good morning Wally,

After the first sampling/analysis for the Pillon project, Ecology's Manchester Lab (MEL) will be doing the quarterly analyses. Normally our data gets uploaded to EIM; do you know if the data users for this project will download data from EIM for their purposes, or will there be a need for MEL to provide other deliverables to EPA or King County?

Thanks,
Alan

EIM would be great; if EPA or other client needs different/additional deliverables this could have a big impact if we need to develop and report in a different EDD format.

I suspect it will be EIM, but used by King County, TCP, Spills, NWRO, EPA, etc. I think we will know more when we see the QAPP. Does this impact how you report the data?

Hi Jess,

Just checking back in on this, is there a way to find out who the data/results will be going to, and what they require for deliverables (assuming not just going to EIM)?

Thanks,
Alan

Subject: RE: May Creek Removal Action Status

Thanks Jess. Since EPA is doing the first round of groundwater samples, will the second round (which Pam and MEL will be doing) occur in about 3 months, i.e. February?

And confirming that these will be 5 GW samples per quarter for 2 years, for:

- TAL metals (23) 8200.8
- VOCs 8260
- SVOCs (BNAs) 8270
- DRO 8NWTPH-Dx
- GRO 8NWTPH-Gx
- Pesticides/PCBs 8081/8082

Will MEL need to send the lab data/results to EPA? If so, what format is required for deliverables/data packages /EDDs?

Alan

Hi Team,

Quick update on the [Pillon property in Renton](#):

EPA and their contractors will start the removal action next week, accompanied by a US Marshall to ensure access. At this time, EPA is not asking us to be on-site. As Wally Moon mentions below, it appears that Mr. Pillon is resistant to the removal action planned by EPA and contractors. In Mr. Pillon's sentencing, the judge required that he allow access to the agencies for monitoring and cleanup.

In addition to removal of hazardous waste, EPA will be doing investigation and sampling to get a better understanding of the site conditions. Part of sampling will include installing groundwater monitoring wells. EPA will take the first round of groundwater samples. Moving forward, EPA has asked us to assist with groundwater samples quarterly for ~2 years. EAP and TCP have coordinated and will be taking the samples to be processed in our lab. Jess Archer and Bob Warren are leading this effort. I will coordinate with King Co to make sure that the site is safe. We will be accompanied by the King Co. Sherriff when our staff is on site for sampling. We will operate with employee safety as our #1 concern. Thank you to Carol and Jim for quickly coordinating on this effort.

Ivy Anderson is providing legal advice and coordinating with ATG Criminal, EPA and King Co. We have an MOU with EPA and King Co in draft that will help us coordinate this work. Looking ahead, Ivy is helping the agencies understand how this site might ultimately be cleaned up under MTCA.

Larry Altose is providing Communication support, and Dustin is aware of the site and issues. Larry is working with EPA and King Co PIO's, and he has a Communication plan drafted. We plan to let EPA speak regarding their removal action, and King Co regarding Solid Waste, but we are preparing for questions regarding long-term cleanup, MTCA, Groundwater quality, etc.

Please let me know if there is anyone you would like me to call regarding this site. And, let me know if you have any questions or concerns that I can help address.

Thank you,
Tom

Subject: May Creek Removal Action Status

Good afternoon everyone,

I'm writing to provide you an update on the status of our upcoming removal action at the Pillon property. Jeff and his team are in the midst of acquiring access to the property through the federal magistrate sometime next week. Today, we were made aware that Mr. Pillon knows this action is impending and we suspect he will continue to resist our involvement at his property and possibly reach out to others. Our contractor hired a utility locator to visit the site, as is usual for a removal action, and apparently encountered Mr. Pillon. Mr. Pillon phoned our contractor directly and spoke to one of the project managers.

Our Public Information Officer, Mark Macintyre, has been working with folks in your agency to coordinate a desk statement to outline the reasons and scope of our removal action in the event we are contacted by interested parties such as the media. My hope is that we have a consistent message going out to any external party.

Feel free to contact myself, Jeff or Mark if you have any questions or concerns.

My cell is below if you need to contact me over the long weekend as Monday is a federal holiday.

Thanks,
Wally
